CASTORIA For Infants and Children

MONTEREY, Aug. 1.—Reports from the sugar producing districts of Mexico give assurance that the cane crop this season is the largest for many years. Grinding has begun in the States of Sinaioa, Morelos and Vera Cruz.

In the pre-revolutionary days before the great sugar plantations and mills of the State of Morelos were laid waste by the Zapatistas, the total annual output of raw sugar of the country was approximately 20,000 tons.

It is estimated that this figure may be reached and possibly exceeded this season. Many sugar mills that have been shut down for several years have been overhauled and arready for regular runs again.

But for the fact that the new government of Mexico has increased the export tax on raw sugar to 20 centavos a kilo, which is equivalent to about 4½ cents a pound, there would be probably considerable quantities of raw sugar shipped to the United States. This increase of duty is double what it has been and is practically prohibitory in its effect. Coincident with the increase of the duty the government lifted the embarge against the exportation of sugar. in Use For Over 30 Years are of Graf H. Fletchors

If this be true it would be plausible that part of Miss Woods's story is true — that Loftis had in fact forced his jewels on her as well as the \$30 she admitted having taken. Contrary to first reports, inquiry developed today Loftis had not been in the habit of carrying large sums of money on his person. This also strengthens Miss Woods's last story that \$20 was all the money Loftis had in the house at that time.

Miss Woods and the taxi driver, Herman Wexler, are still held by the police. All others have been released.

In these days of high cost of living it would be interesting to note just what effect the doubling of the Savings Bank deposits of the country would have upon that condition, for it is evident that every doilar saved and not spent by the individual for luxu-ries reduces just that much the demand for nones-

Excess spending carries with it excess demands for production. Savings reduces the demand upon labor, raw materials and capital for nonessentials. If every dollar in the country went into the Savings Banks there would, of course, be no trade. If

every dollar continues to be spent on nonessentials there will be over demands upon trade. Therefore, find the middle ground.

The Government has made a careful study, the dwich was issued through the Council of National Defense. I these findings should be again called to the attention of the publish was follows:

AT THE NATION'S PRODUCTIVE POWERS HAVE NOT BEEN UTILIZED SINCE THE ARMISTICE.
AT TOO FEW GOODS, NOTABLY THE NECESSITIES OF LIFE,

WHAT LEAGUE SECURES.
These are things which the League with the Lodge reservations secure, if to the League covenant be added, as is likely, the provisions now recommended by the Root-Phillimare commission as to the court of justice and international law. The sanction of the obligation to submit causes of difference to judicial consideration or to that of a conference, is secured in the League with the Lodge reservations by the universal boycott of the covenant-breaking nation. LODGE'S INDICTMENT.

Mr. Lodge's indictment of the League in his notification speech contains the following:

But when we are called upon to become an integral part of a permanent alliance of foreign powers to put ourselves in a position where the youth of our country can be summoned by foreign nations to fight and die in quarrels not their own, to entangle ourselves in all the conflicts and disputes of Europe where we have no interest, to permit foreign interference with our domestic questions, and with the Monroe Doctrine and to sit in an assembly where our vote is not the equal of that of every other country, we absolutely decline the proposition."

Everyone of these counts is covered and provided against by reservations of the League for which Mr. Lodge and Mr. Harding voted.

Neither Senator Lodge nor Senator Harding nor their thirty-two colleagues were under obligation, because of any conditions then existing which will not be present after March 4, to vote for the League with the Republican reservations. The bitter-enders voted against the League with the reservations.

Why did not Senators Harding and Lodge do the same thing? Neckessrily because they thought not only that the reservations completely safeguarded America and removed the objections they had to the League with such reservations was a good thing for the world and the United States and was needed

Back Feel Lame, Sore

you get up these summer mornings feeling tired, achy, and lacking energy and ambition? Do you drag through the day with a steady, nagging backache? Evening find you dull, irritable—"allworn-out?" It's likely then your kidneys are to blame. Modern habits, with constant hurry and worry, lack of rest, and eating too much meat. throw a heavy strain upon the kidneys.

Your back gives out—feels lame and achy; you are tired and depressed and likely suffer headaches, dizzy spells and perhaps an annoying kidney irregularity. Don't go from bad to worse. Get back your health and keep it! Take things easier for a while and begin treating the weakened kidneys with Doan's Kidney Pills. Doan's have brought new strength to thousands. They should help you. Ask your neighbor!

These are Los Angeles Cases:

East Thirty-third Street

Abraham Wood, retired, 1640 East Thirty-third street, says: "I can recommend Doan's Kidney Pills as a reliable remedy, for they have done me lots of good. My kidneys troubled me a great deal and often I had dull backaches and soreness in my kidneys. The action of the secretions was scanty and irregular. I read of Doan's Kidney Pills and used them. They helped me wonderfully by strengthening my back and regulating my kidneys."

South Hope Street

Mrs. V. Muckenthaler, 1826A South Hope St., says: "I hurt my back by doing too much bending over while attending patients is the hospital where I was a nurse. From then of I suffered from severe backaches. The kidneys were weak and caused annoyance. I used Doan's Kidney Pills and they soon cured me of the attack. I can conscientiously recommend Doan's Kidney Pills for this reason." (Statement given May 4, 1917.)

On Otober 7, 1919, Mrs. Muckenthaler said: "I very seldom have need of a kidney remedy now. The occasional use of Doan's Kidney Pills keeps my kidneys in good shape."

East Fifty-fourth Street

Mrs. John Lemon, 202 E. 54th St., says: "About wo years ago my kidneys were weakened by an two years ago my kidneys were weakened hoperation and after that when I overworke too n slight cold it always settled in my back and I suffered awfully. I could not half do my housework. At times I had sharp, quick catches in the region of my kidneys. Headaches made me miserable and I had no energy. I often had attacks of bladder trouble and my kidneys did not act right. I used Doan's Kidney Pills and they helped me wonderfully, strengthening my back and kidneys and derfully, strengthening my back and kidneys and benefiting me in every way. I cannot say too much for Doan's."

East Jefferson Street

Antonio Nunes, 1673 E. Jefferson St., says: "My work in a cold storage plant was trying on my kidneys and caused me to have attacks of backache. I was so stiff and lame I could hardly bendmy back. I couldn't rest at night, and was miserable during the day. My kidneys did not act right and at times the secretions were free and then again scanty. I read of Doan's Kidney Pills and used them. They were what I needed, and soon my back was well and strong and my kidneys were in good shape."

Georgia Street

Mrs. Justine Rogers, 1234 Georgia St., mys: "For kid-ney trouble and all its annoying symptoms, nothing can equal Doan's Kidney Pilla. Some time ago kidney trou-ble was making me feel missrable. I don't exactly know what was the catise of my trouble, but I certainly suf-fered a great deal. A weak, aching and gnawing pain in my kidneys and across the small of my back aggra-vated me greatly. Every day Doan's Kidney Pills were highly recommended, so I used them, and two boxes made a complete and laring cure. (Statement given May 4, 1917.)

How it happened-

"Have one."

"Light another."

"Fill your case," punctuated every conversation on the transports going over. Captain X had taken with him a liberal supply

of Pall Mall famous cigarettes (plain ends). By the time he landed they were gone. "Over There" he couldn't have a favorite brand.

But the cigarettes he was lucky enough to get had one feature that gave him a big idea. They were round and smoked freely. Back in America once more the Captain came

and gave us his idea,—a big idea. He suggested that we make Pall Mall cigarettes round in shape, loosely rolled and plain end-a cigarette that does not have to be tapped, squeezed or loosened, a cigarette with a free and easy draught,

A cigarette made from the famous Pall Mall blend of 42 Turkish tobaccos chosen for richness and delicacy of flavor,

Hagen, fresh from his victory over Jim Barnes for the Metropolitan title, played masterful golf in every detail today, and, paired with Barnes, succeeded in evening the score of the series, of best ball matches that they are scheduled to play against Ed Ray and myself. They trounced us soundly by 4 up and 2 to play, but there was little or no mediocre golf at any hole of the course of the Hollywood Golf. Club at Deal, N. J., where we played the match.

Incidentally Hagen with a score of 70 for the eighteen holes of the second round, broke the course record which had been 72. or par. If he had not made that 70, Ray would have sat a new record therefor he required only one stroke more in the second round than did Hagen. I have been told that shice much as been given Hagen for making the lowest score. The first round found none of us going around in the good form we showed later in the day. But even so, they were able to outplay us and end thit round 4 up for the eighteen holes. We started well after lunch and succeeded in winning the sixth hole which cut down their lead to three. We had a glist of hope, but it did us no good, for when we, either of us, would make a brilliant play, as Ray did, on one or two of the holes we were always neutralized by a counter-bit of brilliant playing by Barnes or Hagens because is certainly was Hagen, because is certainly was Hagen. I have been done the scond round Ray and I thought we had for the many than the scond short hald drives.

I say usually Hagen. I have been done the

An Overburdened Wife If the work that women do and the pains they suffer could be measured in figures, what a terrible array they would present! Through girlhood, wifehood and motherhood woman toils on, often suffering with backache, pains in side, headaches and nervousness which are tell-tale symptoms of organic derangements which Lydia E. Pinkham's Vegetable Compound—made from roots and herbs—can undoubtedly correct. Women who suffer should not give up hope until they have given it a trial.—[Advertisement.

QUESTION OF HOUR.

Wherefore, wherever one seer excited arguing groups in the beach city these days one knows the inalienable right of horseshoe pitching is being thrashed out. At such times Cox and Harding are forgotten, the League of Nations and the cost of living fade into comparative insignificance and the spirit of '75 rises rampant in defense of the cherished prerogatives and sacred susfructs of the citizens.

The trouble is that there is wide divergence of opinion as to what are the rights of citizens. One large contingent holds that the fundamental American principle that

"dads" were busy checking up the list of signatures appended to the petition. What they found will be revealed at the commission's meeting tomorrow evening, which promiseg to be largely attended.

Meanwhile, though August 1 was the day, no one seems to be anxious to interfere with the pastiming in Pacific Park.

It is generally predicted in Long Beach that if the referendum question, involving as it does such fundamental and far-reaching principles of liberty and justice as horseshoe pitching and roque playing, is submitted as an election issue the battle over it will be the bitterest since Gettysburg. It also is certain that the next city election will be affected.

Mitted in Pacific Park, Long Beach to their party contends that those diversions are special privileges and therefore have no place in a park which should offer equal rights to all.

Every day except Sundays for the past thirteen years the Long Beach to Tourists' Horseshoe Club has held continuous sessions as long as the sun shone, twelve months in the year, in Pacific Park.

Although anyone may pitch horseshoes in Pacific Park, more privousness to add seven roque requirement and far-reaching principles of liberty and justice as horseshoes in Pacific Park, more than 600 of the most ardent fans shave organized the club, which takes care of the grounds, busy is president and George E. "The Near East is a laboratory for sociological study, such as cannot be found anywhere else in the world. For hundreds of years the outstanding political problem of the world has been the question of who shall inherit the territory once belonging to the great Ottoman Empire, at one time the greatest of the world. Upon the political problems of the Near East hangs the peace of the world. And I want to show you the way in which you and the sister churches in this country, and all the Christian people of America are working out this problem. It was 10b years ago that the American board sent our first missionaries to Turkey. And in that hundred years the missionaries to Turkey, and in that hundred years the missionaries to Turkey, particularly during the suffering and horrors of the war, Increasingly in the later years we have found to the people of Turkey, particularly during the suffering and horrors of the war, Increasingly in the later years we have found to the people through the colleges and hospitals. From the earliest days of the work the missionaries have established schools for the training of the young people. These schools have been developed into high schools, then into colleges each one a great center of influence for good. The more one studies government the more FIRST CONGREGATIONAL

CAMPAIGN FUNDS.

The Democrats are not going to be as particular regarding the source of their campaign funds as they thought they would be. Some time back William Gibbs Mc. came up to the surface and blew of some steam to the effect that there would be no purchased Presidency in America and that the spotlight of pittless publicity would ed upon all campaign contribu be directed upon all campaign contributions.

Even at that time political sleuths were
trying to locate the wherewithal and backing of the McAdoo boom. Now that the
nominations have been made and a new
man—a White man—is in charge of the
Democratic organization, it is announced
that any restrictions as to the size and funds intrusted to its care, reserving the right to scrutinize their origin, if ble, to avoid the appearance of any ation on the part of the candidate to any individual or interest. Plunder was the incentive for the mobil lastion of the Red legions. They were told that they could sack the cities they capin the field and they are now asserting their right to loot. On one part of the line the Polish commissioners have been given age conduct to the Russian headquarters; but on other parts the Red armies are drivide and violating the women.

There is no idealism in the Red forces.
They are not fighting to establish Communism in the countries which they invade.
They are not concerned about the triumph of the proletariat; for they have as little use for the peasant as for the lord. And in refusing to obey orders from Moscow they are not violating any of the tenets of sovietism. No commender in the field is empowered to enforce his commands. The colonel of a regiment and the captain of a company simply advise and suggest. The men possess the right of referendum on every order given; and it appears that the men have elected to crown their military exploits by sacking the cities of Poland. Lenine and Trotsky are responsible for this attitude on the part of the Red armies. They have conceded to the troops the right to govern themselves; and the troops have made use of that right to free themselves from all outside influence. The army is supreme; because the army possesses the might to roam where it lists and stop

where it tires. It will exercise that might until an association of peoples is organized, strong enough to oppose a superior might. Trotzky has reached a place where he is as impotent to command the Red troops as was Kerensky; and it is probable that the army will select one of its leaders in the army will select one of its leaders in Trotzky.

An army of 1,000,000 men obeying no lead ership but its own fancies, composed largely of men who have been called to the colors by pledges of plunder, is probably the greatby pledges of plunder, is probably the greatest single menace by which European civilization has been confronted. Not since the days of the Roman legions has an army broken completely away from administrative control. The very principles which Lenine promulgated rob him of the right to compel obedience to his dirtates. The Times has repeatedly pointed out that Bolshevism was nothing less than organized anarchy. It is now following its natural bent.

They dispossess the owner of one acre of his two cows just as readily as they rob the possessor of a thousand acres of his flocks. They violate the maid as ruthlessly as the mistress. They make no distinction of degrees of wealth, riffing a pay envelope as

Gen. Ludendorff, who possesses the doubtful distinction of having been a good sol dier in a bad cause, attributes the rise of Boishevism to "the obtuseness of govern-ments and the lethargy of the middle classes, as the latter like to stay quietly: me on decisive days." The faults of the last three years can only be redeemed by sacrifices. Those who desire to pre-serve the faith and the institutions of their fathers, the sanctity of the home and the lawful administration of justice, must be prepared to make the sacrifices necessary to attain those ends. It probably means more bloodshed in Europe, the rem tion of armies and taking up again the burdens of war. The greater the reluctance shown in this regard, the more dangerous will the Red terror become. The Times is unshaken in its belief that civilization will win in the end; but it would be folly to blind ourselves to the real peril and ose only moral precepts to the

Therefore those in charge of such vehicles should be charged with exceptional care and should be equal to the responsibilities resting upon them. Instead of that, in very many cases it is found that the driver of the motor truck is a careless and irrespon-sible youth with an unrestrained passion for speed and a reckless whim for taking every chance of the road. He will cut cor-ners at a harrowing clip and will take a fiendish joy in rushing up to a corner in a way that will prevent all persons from There may be traffic ordinances, but they

The passion for speed on the part of all drivers must be curbed. More than half the fatalities that are chronicled might have been avoided had the driver been going at a slower speed that would have enabled him to promptly check and control roads. It must not also be permitted to imperil lighter traffic and kill off pedestrians. Suitable official action must be taken to correct a situation cr that is becoming intolerable.

There may be a bit of politics in the Presi dent calling the first meeting of the League of Nations at Geneva for November 15, a few days subsequent to the election. The imminence of the spectacle is intended to shame the American people into voting for Cox and Roosevelt upon the ground that only by the election of the Democratic ticket can America be entered as a mem ber of the world alliance.

There have been a number of front-porch candidates for the Presidency in this country who have won the election. We recall Franklin Pierce, Abraham Lincoln, Gen Grant, Grover Cleveland and William Mo-Kinley. Presidents Wilson and Roosevelt WANT A COAL FAMINE.

An outlaw strike of coal miners in the East and Middle West is now in progress. The miners are following in the foot steps of the radicals among the railroad brotherhoods. President Lewis of the Unit ed Mine Workers says that the strike is trauthorised, that the men are acting on their own initiative and that there is nothing the national union can do about it.

Enough miners have already downed tools to seriously lessen the coal output, which may be 10,000,000 tons below that of last year. The mine operators attempted to speed up production during the summer months to insure a full winter supply; but the union miners are apparently dete that there shall be another coal famine in order to increase the public discontent.

Sovietization of the coal industry is the

professed objective of the miners' union. They are determined to make private operation a faffure, to force a coal famine and compel the government to seize the mines in order to keep the home fires burning during the hard winter months. About half the members of the miners' union are unnaturalized Toreigners who are seeking to repeat Russia's experience in this country. As they are not citisens they are deaf to the appeals of patratism. Few of them have relatives here and they are not moved by the prospect of suffering among the families of the poor. They figure that they have nothing to lose in general revolution and that they might get hold of something that now rightfully be

In normal times the places of the strikers cou quickly filled, for it doesn't take one long extraordinary labor conditions, it is possible that the East and the Middle West will suffer seriously for coal during the coming ily who resides in Los Angeles. Here the relates to gasoline; and cutting down the supply for the pleasure cars always leaves enough for delivery machines,

TOM CONNALLY'S PROTEST.

Recently there have been signs of the danger of Irish-Americanism. We have seen men calling themselves American citizens trying to influence the policies of American political parties to suit the propaganda of an Irish agitator in the interest of Ireland and because of attachment, not to America, but to Ireland.

A protest against this Irish form of hyphenism was raised before the platforn committee of the Democratic convention by a member of Congress from Texas. Repre sentative Tom Connally. And it came with sentative Tom Connaily. And it came with all the greater force because it came from an American of Irish descent. In a hear-ing by the committee, Representative Con-nally, declaring that the proposed plank pledging the party to official recognition of the republic of Ireland was not the proper expression for the convention, said: "I am an American, although my ances-tors were of Irish blood. Wool growers and manufacturers of wool have had high prices for a number of years. Their products have carried liberal profits. The interest of the consumer has been far from their thoughts, so long as they could find a market for their goods at whatever price they chose to ask. Now a reaction has set in. Buying power of consumers is being restricted closer to actual needs. The conservation of clothing by westers is being felt by the producers and manufacturers of wool. And they will continue to feel it until the price of clothing has been lowered. They might as well recognize this now as later.—[Cincinnati Enquirer.

RECOLLECTIONS OF SENATOR WHITE.

BY JUDGE MONROE, In Los Angeles "Review."

I came to Los Angeles the last of December, 1890, and met Stephen M. White in January or February, 1891, in the trial of a case before Judge Wade. I represented the plaintiff, and J. S. Chapman, Mr. White and John D. Bicknell were beaten, but each of these three gen-tlemen separately congratulated me on the way I handled the case. I was a newcomer and a stranger and was naturally much gratified by this courtesy, and from that case result ed a friendship with all three which lasted as long as they lived. It is difficult to write in detail of

my association with Senator. White, for I must depend solely upon recollection. I kept the dockets, letter heads and records of our office for more than ten years after his death (1901) and then they were burned. Soon after Mr. White's election to the United States Senate (1892) we were in attendance on the Supreme Court, which was then held in the

Court, which was then held in the McDonald Block on Main street, north of First. We were in the clerk's office waiting to be called and I suggested that, as he was to and I suggested that as he was to be away so much of the time, we form an equal partnership, to last during his term, and that I attend to all business during his absence and assist him when he was here. He said he had been thinking of that very thing and that we would do that before he went in December.

ber.

That conversation was in April.

Nothing more was said until some time in the autumn, when we spoke of it again and we started in. The only thing he said was that he would like to keep Billy Cardwell, who had been with him a good many years and had kept the books and was a sort of manager. He re-mained with us as long as we were together, and afterwards with Mr. White as long as he lived. The conversations I have related

constituted the only partnership agreement we ever had. We never had a writing of any kind and never had a word of disagreement.

I call to mind an amusing inci-dent in the course of the trial at San Diego of a case based on a Geed to the Warner ranch which was said to have been lost or de-stroyed. Judge Works was one of the attorneys against us and it was a very hard-fought case. Mr. White, of course, took the leading part and won the trial, which occupied about six weeks. With clerks stenograsix weeks. With clerks, stenogra-phers and witnesses we occupied the ccean side of the Coronado Hotel, and as it was in the off season we had the place pretty much to our

selves.

There was an Irish woman on the stand, called by Mr. White. Judge Works made a motion to strike out her answer to one of the questions. The trial judge said, "Strike it out." She turned to him very indignantly and said, "Sthrike it out, do you? Well, you can sthrike it in again, for it is the truth."

Mr. White came into my room one day and said a prominent woman

She had told fhe name of the lawyer who was bringing the case. In the course of the conversation I learned that the defendant had deserted his wife more than a year before. I suggested to Mr. White that he see the lawyer and try to have desertion the only cause of action mentioned. The plaintiff's lawyer adopted the suggestion.

Mr. White was back in his office in less than an hour and told me of his success. I asked him what he was going to charge and he said "Nothing." I made out a bill and banded it to him and said, "When she comes in to find out what happened give her this. You will find the will pay it quick." And she did.

When I gave this advice I was not on the divorce bench.
When I suggested the partnership I expressly stated that it was to be only for the time Mr. White was in the Senate. When his time expired (1899) I told him I would go or stay, according to his pleasure, but if I stayed, as he was to be home all the time, an equal division would not be fair, and I would be satisfied with whatever division he might fix.

might fix.

He said he would think it over and in a day or two he said he had been alone for many years before he was elected to the Senate and he be-

was elected to the Senate and he re-lieved he preferred to be alone for the rest of his life.

It took us less than an hour to agree upon a division of the fees due and of the pending cases, but we remained in the same office for several months after that. He and ir remained the best of friends as

several months after that. He and i remained the best of friends as long as he lived.

When I left Mr. White's office Judge Clark had recently died and I desired, if possible to be appointed in his place. Gov. Gage was then in office and Mr. White said he thought he could obtain the appointment for me. For some time it looked as if it would come my way, but one afternoon one of the eve-ning papers announced that I would not be appointed on account of some sharp words I had used toward Gov. Gage in a matter we had tried against each other before the Board of Supervisors. A few days after that Judge Fitzgeralu was appointed and I waited until April, 1905, when

I was appointed by Gov. Pardee.
Mr. White used to say that the
good lawyer was 'the one who won
cares, that the ability to make a
brilliant argument did not make a man a good lawyer if he could not win. He was usually very particu-lar not to take cases unless he was

reasonably certain to win, and this regardless of the amount of the fees. I have never known another law-yer like him. There have been good civil lawyers and good criminal lawyers, good jury lawyers, good law-yers in court and good office law-yers, but he was the best we ever had here in any line. There was not a lawyer who was his equal in criminal cases and in the civil de-partment; whether with or without a jury he was easily the best. SOME IMAGINARY CONVERSATIONS.

Disinfection Cuts Down the Sick-List

Big sick-lists are unprofitable to the man who pays salaries. That's why organizations siming at high efficiency take every available means to protect the health of employees.

Frequent disinfection is one of the first steps in health protection. Proper disinfection kills disease germs and thus prevents sickness from aprending throughout the establishment.

Cuspidors, toilet-rooms, sinks, drains, floors, window-sills, dark corners—all are favorite, birthplaces for disease germs.

Sprinkle a solution of Lysol Disinfectant frequently in all such places. Insist that Lysol Disinfectant be added to all scrubbing

Used regularly, Lysol Disinfectant kills germ life or prevents its creation.

A 50c bottle makes five gallons of powerful disinfectant; a 25c bottle makes two gallons. Remember, there is but one genuine Lysol Disinfectant—made, bottled, signed, and sealed by Lehn & Fink, Inc.

San Diego Army and Navy Academy

The Academy has enjoyed for years the highest rec-mition from the Colleges and from the War Depart-ent; it is the University of California's "Division A."

The deep heart interest in a boy, the spirit of good fellowship, the great amount of individual care and attention given the student, the Academy's genuinely demoratic atmosphere and absolute freedom from snobbishness—these are some of the features that are so strongly appealing to red-blooded young Americans and to discriminative preperts.

ner the health department has just details of a joint indignation meetpished tabulating results of a milk-

During the past week samples of nilk were collected from every milk milk were collected from every milk dealer and dairyman serving Los Angeles who has more than five cows or soats. These were scored at the health department by Dr. F. P. Wilcox of the State Department of Agriculture, Sacramento; G. D. Turnbaw of the University of California farm, Davis, and R. J. Posson of the United States Department of Agriculture, Sait Lake City.

The samples collected during the week were averaged with all other samples obtained during the last four months, and each dairy's milk given a rating on a milk score card adopted by the dairy division of the United States Bureau of Animal Industry.

This score card allows 100 points.

United States Bureau of Animal Industry.
This score card allows 100 points for perfect, of which thirty-five points are for bacterial count, fitteen for flavor and odor, ten for absence of sediment, fifteen for butter fat, fifteen for solids not fat, five for acidity and five for appearance of package. The dairies are averaged in five classes as follows: Certified, guaranteed, raw, pasteurized and goat.

This is milk that has been heated to a temperature of about 142 deg. Fahr, and held for about twenty-five minutes, then rapidly cooled to below 50 deg. Fahr. Bacteria limit not to exceed 15,000 per cubic centimeters after pasteurization and 200,000 per cubic centimeters before.

LEAVE IS EXTENDED.

The leave of absence granted to Ir. James A. B. Scherer, president of California Institute of Technology, who is in poor health, has been extended by the board of trustees of the college. Dr. Scherer is now on leave until October 1, but the board voted to give him a longer time, if necessary, in which to regain his health. Dr. Scherer suffered a physical and nervous breakdown and was ordered by his physician to give up the many details of college management for a time. Dr. Scherer has been resting at his homehere and employing some of his idle hours at writing. He is already the author of several books, but lately has been engaged at writing scanarios for motion pictures.

IN NEW FIELD.

Den, Kern coun'y, show that there is a good deal of work now underway. There are quite a few new leases, and many rigs are under construction. Most of the companies are now working on the theory that deeper drilling will result in the opening of more extensive oil fields. Formerly efforts were confined to the drilling of shallow wells with only fairly good results.

Shipping is a Growing and Profitable Industry

The impetus given the shipping industry by the war has awakened the Pacific Coast to a realization of the benefits to be derived from the healthy and stable growth of this ancient industry. Today we are speaking in familiar terms of what the shipping industry can do for us, whereas but a to rely entirely upon foreign bottoms for the transport of our merchandise.

'The growth and expansion of any industry, so long as it is sound, offers a field for the profitable employment of capital. Marine shipping offers investors an attractive field for their funds.

The best type of steamship security is known as the Marine Equipment Bond, such as the China Mail Steamship

Bond, such as the China Mail Steamship Corporation of California First Mortgage 8% Serial Gold Bonds.

These bonds are secured by a first mortgage on steamships operating on established and profitable trade routes between San Francisco and the Orient.

The net earnings of the corporation have always been greatly in excess of the interest on this issue and last year amounted to more than 8½ such charges. These bonds possess every feature of safety found in this type of security, which has always been considered the prime of good investments. The price of these bonds is 100 and interest; the yield is 8%. Full information may be had by calling, writing or phoning for Circular T82.

MARRIED LIFE" BLUE-RIBBON

COMEDY AT KINEMA.

By Grace Kingsley. sure to visit the Kinema thi rek, if you want to forget your

week, if you want to forget your troubles. If you haven't any troubles, go anyhow, and enjoy yourself. If the beauty show doesn't get you, the comedy must.

A five-reel comedy of the sort commonly known as slap-stick, was once considered an impossibility, or at least an improbability; but Charlie Chaplin made one, and then others followed: and now Mack Sennett has made the very funniest one that's been done outside the Chaplin studios. It is entitled "Married Liffe," and is on view at the Kinema this week. This is the second of the Sennett five-reelers, and "Married Life" is a very great improvement over "Down on the Farm."

"Married Life" is really farce, insamuch as it has a story, even if a thin one; but on it is hung a brilliant array of comic hokum gems, the brightest, in fact, that have emanated from the Sennett studios in many moons, and it is to these the comedy owes its big punch.

staged for charity by the doctor wife, and in which the remarks of the audience, conveyed through subtities, are almost as funny as the play itself, with its comic mishaps such as always occur at amateut performances. Ben Turpin is the hero of the melodrama, and I don't remember anything funnier than his dismay when the hebby horse he rides down to the old farm has its runners exposed when the fence falls over, and he exclaims: "Now the andience will know it isn't a real horse!"

Probably the funniest and most original bit of hokum is when Turpin takes gas before an operation, bin the markets, though evidently and better ook to his laurels!

Thurston Hall, formerly of the Morosen, is the heroine, and heroines right handsomely; and Arline Pretty is the heroine, and heroines right handsomely; and Arline Pretty is the heroine, and heroines right handsomely; and Arline Pretty is the heroine, and heroines right handsomely; and Arline Pretty is the heroine, and heroines right handsomely; and Arline Pretty is the heroine, and heroines right handsomely; and Arline Pretty is the heroine, and heroines right handsomely; and Arline Pretty is the heroine, and heroines right handsomely; and Arline Pretty is the heroine, and heroines right handsomely; and Arline Pretty is the heroine, and heroines right handsomely; and Arline Pretty is the heroine, and heroines right handsomely; and Arline Pretty is the heroine, and heroines right handsomely; and Arline Pretty is the heroine, and heroines right handsomely; and Arline Pretty is the heroine, and heroines right handsomely; and Arline Pretty is the heroine, and heroines right handsomely; and Arline Pretty is the heroine, and heroines right handsomely; and Arline Pretty is the heroine and walle to the pict

of entertainment. See it and laugh, that's all.

As for Ben Turpin, he is making rapid strides as a comedian. He seems to have a faultless sense of the comic and of his own peculiar comedy talents. The remainder of the cast, including Charles Conklin, James Finlayson, Phyllis Haver, Charlotte Mineau, Kalla Pasha, Charles Murray, Ford Sterling and Louise Faxenda, are all round pegs in round holes.

In addition to the feature there is a wonderfully beautiful set of poses by the bathing siris, a real beauty show; there is a novel introduction of the characters by a ballyhoo. Also there is a travelogue showing the Alaskan volcanic region that is uniquely beautiful. Roy Smoot, the young tenor, is rapidly making a big following for himself.

SNOW FILM WELCOME

AT COOL SYMPHONY.

You know perfectly welf how it's all going to turn out, the minute you see the snow, and the Indian maid, and the noble young lumberman and the lumber company's president's daughter. So you don't bother about the plot at all, but keen watch for those beautiful vistas of cool, snow-capped mountains, those delicious snow storms, those enticing drifts. The name of it doesn't matter particularly. But I'll just mention its name is "The Valley of Doubt," and it is at the Symphony. Whenever you see a Williard Mack, story advertised, you do as a matter of fact enter the valley of doubt, "Because you don't know whether it's going to be very, very good, very poor, or mediocre. "The Valley of Doubt." In this case is mediocre. It's the old stuff, without a fresh angle. There's the usual hero so busy sacrificing himself for anybody, he can get a chance to do it for, that you wonder how he gets his work done; there's the villian who ruins the Indian girl and knifes everybody is sight. Well, ves, there is a new character in this. He's a big dog, who saves the herolne's life by leap-

EUGENÉ WALTER PLAY AT THE MAJESTIC THEATER.

By Edwin Schallert.

Playwrights who specialize in irama with a punch generally tip heir hats in passing Eugene Waler for his ability to line up a thundering battery of realistic dialogue and situations to stir up thought. The heading femining part.

maxes with a vengeance.

There are many draggy places in the play. The newspaper office scene, while quite accurately staged for once, lacks significance in its earlier portion. The climax in the committee of Associated First National Pictures, Ire., in which is incorporated a complete lature meeting is overdone with sensational pungency. And as a whole in its rough-shod method of dealing with the characters and plot the play hardle. stead of which the husband in this picture appears as temperamental as a prima donna.

One cannot get at his motives. There is no consistency to him. One moment he seems to want to get his wife with her lover for the pure joy of being devilish, the next minute you suspect his motive is to get rid of her so that he can get the other woman who has been accused of taking him away from his wife, and next moment he is so jealous he chokes her. Everybody seems a little insane. The wife one moment throws herself at her lover's head and asks him to take her away, and next minute says she can't go. Then hetells her he can't take her, and then says yes, he must. It's all very joity, and the story lacks bainnee.

Miss Earriscale's candid, womanly portrayal of patient faithfulness under trial is the sole redeeming and convincing feature in a story which is not only inconsistent, but is full of the old stuff—the girl who marries a rich man to redeem the family fortunes—the husband who steas his own papers and lays the blame on the lover, etc.

But I must gause to give a word of praise to Eugene Gaudio's beautiful photography. Poor Gene, beloved of his company, who passed away yesterday gnorning.

As for "The Girl in the Webb," Miss Blanche Sweet is even more wasted in it than is Miss Barriscale in her play. "The Girl in the Webb," is a telescoped serial.
